PATIENT INFORMATION LEAFLET

DR. SHILPI BANSAL

M.B.B.S., M.D. (SKIN), F (IADVL)
DERMATOLOGIST, DERMATOSURGEON & COSMETOLOGIST

Having a clear, bright and glowing skin is everyone's desire and dream today. **Dr Shilpi Bansal** and her team at **Elite Clinic** work together to fulfil those desires and dreams. Our skin care services are designed to help you get rid of all your skin issues.

LASERS AT OUR CLINIC:

Laser hair Reduction:

Painless Lasya Trinity Triple wavelength laser is used for hair reduction at Elite Clinic after a thorough medical and hormonal evaluation of your body to treat the root cause effectively.

Laser tattoo removal:

Tattoo removal is done at our clinic with the help of our US-FDA approved IRIS S

+ Qs Nd YAG laser. There are various techniques for the same.

PIGMENTATION TREATMENTS:

Laser toning - Our US-FDA approved Qs laser gives you a beautiful skin free of sun spots, moles & melasma. Laser Toning is a very safe, effective & economical procedure meant for a clear, lighter & glowing skin.

Lip Lightening and dark circles treatment is also done.

Carbon laser - carbon paste is added to laser toning to reduce acne, pores and also reduce pigmentation.

Laser Facial - Laser toning is combined with hydrafacial to give you a glowing, hydrated and rejuvenated skin.

Hydrafacial - Hydrafacial is our skin repairing service giving you a bright and youthful look. It is a seven step procedure requiring about 90 minutes.

PHOTOFACIAL:

Photofacial is a facial rejuvenation procedure which uses laser energy to tighten and lift your loose skin. The laser energy heats up the collagen in your skin and tightens it.

ENZYME FACIAL:

Enzyme facials are a combination of pineapple, pumpkin & papaya fruits and help in improving skin tone & texture giving instant glow to the skin.

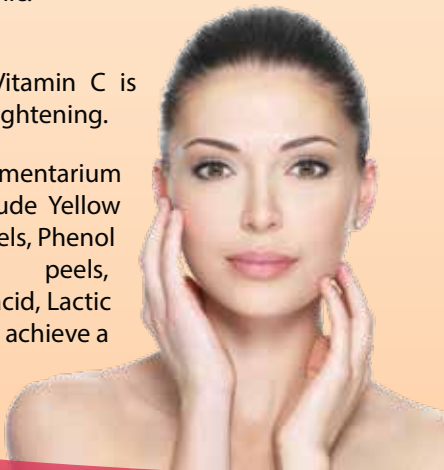

MESOTHERAPY FOR GLOW:

Vitamin C, Glutathione, Tranexamic acid, Phosphatidyl Choline, hyaluronidase, minoxidil, saw-palmetto, vitamin E, Pantothenic acid etc are few of the agents used for mesotherapy at Elite Clinic.

GLOW DRIP:

IV Glutathione with Vitamin C is given to achieve skin brightening.

Chemical peels - Our armentarium of chemical peels include Yellow peel, TCA peels, Black peels, Phenol peels, Combination peels, Salicylic acid, Glycolic acid, Lactic acid etc. which help you achieve a clear and glowing skin.

SKINCARE SERVICES

Acne scar treatment: PRP, microneedling, subcision are various treatment for acne scar reduction.

MOLE & WART REMOVAL

Scarless removal of moles & warts is done at our clinic with the help of our radiofrequency technique.

STRETCH MARKS:

Reduction is possible via multi-modality treatment like PRP, microneedling, lasers, etc.

Open Pores - Shrink those pores on your skin with the help of Mesobotox. It gives an improved sheen of the face with smooth and tight skin.

ANTI-AGEING SERVICES

Fillers For Skin Tightening & Lift-Dermal fillers are indicated for cheek augmentation, face lift, tear trough, nose shaping, forehead and temple hollows, lip augmentation, neck lines, chin augmentation etc.

Botox for wrinkles - Cosmetic indications of Botox are forehead lines, frown lines, crows feet, bunny lines, square/broad jaw, neck puckering and wrinkles.

PLATELET RICH PLASMA (PRP) THERAPY

PRP is prepared by the "double spin method" and has diverse uses from hair regrowth to skin rejuvenation, acne scars, traumatic scars, melasma, crinkling of skin around eyes, fine lines and stretch marks.

HAIR CARE

Microneedling For Hair Growth

Microneedling is done by Dermapen at our clinic and a solution containing hormones, vitamins and minerals is infused through microchannels in the scalp. This works by stimulating stem cells and activating growth factors, stimulating hair growth.

PRP For Hair Growth

Platelet rich plasma is prepared by the "double spin method" and injected into the scalp. It stimulates the adult stem cells and gives us hair growth as well as improve the quality of hair.

Growth Factor Concentrate therapy (GFC) is an advanced form of PRP to achieve better results in the patients. This therapy is a step ahead of the normal PRP therapy.

DERMATOSURGERY

Skin-Biopsy

Skin biopsy is a procedure in which a small piece of skin is removed from the body for examination, and sent for histopathological examination, to establish or confirm a precise diagnosis.

Vitiligo Surgery

Multiple surgical techniques like Melanocyte Keratinocyte Transfer, SMASH Grafting, Suction Blister Grafting, Split Thickness Skin Grafting are available at our clinic for vitiligo patients to impart colour to white patches.

Ear Lobe Repair

It is a surgical repair of the earlobe due to an elongated or torn ear piercing using local anaesthesia for a painfree experience.

NHET For Sebaceous Cyst, Lipoma & Moles.

Narrow hole extrusion technique is a simple procedure performed using a punch to remove a circular piece of skin over the lesion, the lipoma/cyst is then extruded through the hole.

Nail surgery

Partial and complete nail removal, Chemical matricectomy, nail biopsy, intramatrix injections etc are nail surgeries performed at our clinic with utmost asepsis.
